

journey through the desert was long and difficult, but they were guided by the light of their faith and sustained by their dream of liberty. When at last they arrived in the Promised Land, they rejoiced in their freedom to worship God, to rebuild their communities, and to raise their children in the traditions and beliefs of the Jewish religion.

As a people who have always cherished the values of faith and freedom, all Americans can draw inspiration from the story of Passover. It reminds us of our ongoing journey to build our own Promised Land, where all people are free to worship according to their conscience and where our children can grow up safe from the shadows of intolerance and oppression.

As families across the nation and around the world gather to remember the liberation of the Israelites and to teach a new generation the ancient tradition of the Passover Seder and the reading of the Haggadah, let us all give thanks for God's sustaining love and for the Jewish heritage that has so strengthened and enriched our national life.

Hillary joins me in extending best wishes for a joyous Passover celebration.

**Bill Clinton**

**Letter to Congressional Leaders  
Transmitting a Report on Chemical  
and Biological Weapons Defense**

*March 30, 1999*

Dear \_\_\_\_\_:

Attached is a report to the Congress on Chemical and Biological Weapons Defense, submitted pursuant to Condition 11(F) of the resolution of advice and consent to ratification of the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction, adopted by the United States Senate on April 24, 1997.

Sincerely,

**William J. Clinton**

NOTE: Identical letters were sent to J. Dennis Hastert, Speaker of the House of Representatives; Jesse Helms, chairman, and Joseph R. Biden, Jr., ranking member, Senate Committee on Foreign Relations; John W. Warner, chairman, and Carl

Levin, ranking member, Senate Committee on Armed Services; Ted Stevens, chairman, and Robert C. Byrd, ranking member, Senate Committee on Appropriations; Benjamin A. Gilman, chairman, and Sam Gejdenson, ranking member, House Committee on International Relations; C.W. Bill Young, chairman, and David R. Obey, ranking member, House Committee on Appropriations; and Floyd Spence, chairman, and Ike Skelton, ranking member, House Committee on Armed Services.

**Letter to Congressional Leaders  
Transmitting a Report on Cyprus**

*March 30, 1999*

Dear Mr. Speaker: (Dear Mr. Chairman:)

In accordance with Public Law 95-384 (22 U.S.C. 2373(c)), I submit to you this report on progress toward a negotiated settlement of the Cyprus question covering the period December 1, 1998, to January 31, 1999.

In an important step toward easing tensions on Cyprus, the Government of Cyprus announced on December 29 that the S-300 anti-aircraft missiles that it had ordered from Russia would not be delivered to the island. This positive and welcome decision gave important new impetus to efforts to reduce tensions and promote a just and lasting settlement of the Cyprus dispute.

The United Nations remained active during the reporting period in the effort to resolve the Cyprus dispute. In addition to renewing the mandate for the U.N. Forces in Cyprus (UNFICYP), the U.N. Security Council adopted Resolution 1218 that endorsed the Secretary General's September 30 initiative to reduce tensions and promote a just and lasting peace on Cyprus. In a December 23 statement, I wholeheartedly endorsed Resolution 1218 and directed that the United States take all necessary steps to support a sustained effort to implement it. As I said then and wish to emphasize now, the United States remains deeply committed to finding a viable solution to the Cyprus problem.

Sincerely,

**William J. Clinton**

NOTE: Identical letters were sent to J. Dennis Hastert, Speaker of the House of Representatives,

and Jesse Helms, chairman, Senate Committee on Foreign Relations.

### **Remarks at the Electronic Industries Alliance Dinner**

*March 30, 1999*

Thank you. First of all, I want to thank you all for giving me a chance to come tonight. I thank my longtime friend Dave McCurdy for his introduction and for his leadership of EIA. You made a good decision when you named him your president. And I know what you're laughing about out there. *[Laughter]* Two or 3 years from now, you'll think it's an even better decision. *[Laughter]*

I want to also pay my respects to your vice president, John Kelly, who went to Georgetown with me, although he's a much younger man. *[Laughter]* John—when I was a senior, John was actually president of the freshman class. And I've been trying to think out of respect for the will of the people—the only people we knew back then—whether I should still address him as “Mr. President.” *[Laughter]* But then that would confuse the EIA, so I didn't do it.

Mr. Major, thank you for your invitation. Mr. McGinn, thank you for your remarks. That was very impressive. I couldn't even keep up with all the new things you announced tonight.

I'm glad that our FCC Chairman, Bill Kennard, is here, and I think Secretary of the Army Louis Caldera is also here. And General Jones, I thought you gave a terrific invocation. Thank you very much. I appreciate that.

You know, I was trying to think tonight whether there was any way I could say what I originally wanted to come here and say, which is to talk about some of the technology policies that we're trying to pursue that I hope will help you, but in the process will strengthen our democracy and the sweep of opportunity and freedom around the world, and at the same time say a few words, as I feel I must, about our important mission in Kosovo.

And before I came over here tonight, I had a long meeting, and I went and had what has now become almost my daily phone call with Prime Minister Blair. And I sat down

and I thought about it. I thought about how grateful I am to the members of this organization for the phenomenal successes you have enjoyed in these last few years and the major contributions you have made to the economy of the United States, the opportunities you have given our people. And I thought about this terrible brutality that is going on in Kosovo, replaying what happened not so long ago in Bosnia, and in a way, replaying what we see around the world, the modern world, that seems to be troubled with ancient hatreds rooted in racial and ethnic and religious differences.

If you think about the major forces alive in the world today, the move toward globalization and the explosion in technology, especially in information and communications, they really not only, as all of you know better than I, are dramatically changing the way we work and live and relate to each other and to the rest of the world. They represent both a pull toward integration and a dramatic force toward decentralization. And I would argue to you that both forces have within them the potential for enormous good and enormous trouble for the world of the 21st century.

If you think about the forces toward integration of the global economy, for example, that's a wonderful thing. But it can be very destabilizing if we leave whole countries and vast populations within countries behind.

If you think about the explosion in technology and how wonderful it is in empowering individuals and small firms and communities, and enabling communities—little schools I've seen in poor African and Latin American villages—to hook up to the Internet and have access to learning that would have taken them a whole generation, at least, to achieve through traditional economic development processes in their countries. It is breathtaking.

But looked at another way, it also provides access to technology for every terrorist in the world to have their own website, and for independent operators to figure out how to make bombs and set up chemical and biological labs.

And when married together with the most primitive hatreds, like those we see manifest in Kosovo today, the advent of technology
